

Robin Malaval.

Full-Stack Engineer / Booking & Payments SaaS / OTA Integrations

• open to work · focus ai-assisted development, reviewed by hand
malaval.robin@hotmail.fr / +33 6 13 03 85 19 / robinmalaval.com / github.com/RobinMlv1

◆ PROFILE

Full-stack engineer who builds products end to end and runs them in production: **TypeScript and React** on the front, **Node, PostgreSQL and Stripe** behind, tested on a real database. Four products, solo, since 2025.

◆ EXPERIENCE

Founder & Engineer / Dewex 2026 / Present

dewex.io

Booking software for outdoor activity operators, built and run solo

- + **Dewex**, in production since July 2026: every operator gets their own booking site, calendar and Stripe account, from one multi-tenant Next.js app with a no-code site builder in 21 languages.
- + Money and concurrency in PostgreSQL: the last seat goes to exactly one of two simultaneous buyers; direct charges on the operator's Stripe account, commission in integer cents; row-level security on all 48 tables.
- + **8,547 tests** with integration suites on real PostgreSQL in CI, 100 migrations, one-commit rollback; **2,390 commits in 93 days**.
- + **Dewex OS**, the internal platform: lead analysis, AI demo factory with human review, outreach, finance; 13 BullMQ queues, 9 LLM agents, 3,438 tests.

Volunteer Software Developer / Algoritmi 2026

algoritmigroup.com

- + Guest portal for hostels with no front desk, in three languages: I built its "call staff" flow, a call to the team over WebRTC and server-sent events.

Full-Stack Developer / Independent 2022 / 2026

Web platforms and SaaS for tourism, hospitality and small businesses

◆ SELECTED WORK

Swiss Local Adventures BOOKING PLATFORM · OTA CONNECTIVITY

swisslocaladventures.ch

Booking site in four languages for a Swiss tour operator, built solo: catalogue, booking flow, Stripe payment, automated confirmations. **GetYourGuide's Supplier API implemented both ways**: six endpoints, from availability to an idempotent booking, with availability pushed back after every change.

riview.me RESTAURANT REVIEW SAAS

riview.me

Turns a QR scan at the table into a Google review or private feedback, gated by a sign-in and a reward wheel. Three Stripe plans. Next.js, Prisma, NextAuth.

◆ BACKGROUND

Hospitality & Service / International 2019 / 2026

Server, bartender and team-lead roles across 6 countries (Iceland, Japan, Canada, Australia, France, Saint-Pierre-et-Miquelon), in English-speaking environments

◆ STACK

Frontend

Next.js React React Native
TypeScript Tailwind

Backend

PostgreSQL Node.js
Express Supabase Prisma
MongoDB Redis BullMQ
WebSockets SSE WebRTC

Testing

Vitest Testing Library

Infrastructure

Linux VPS Docker PM2
Caddy Cloudflare Vercel
Railway GitHub Actions

Payments & Integrations

Stripe Connect Stripe
Webhooks GetYourGuide API

AI & Automation

Claude Code Codex
AI Agents MCP OpenAI API

◆ EDUCATION

Web Developer

Bachelor · OpenClassrooms ·
2020-2022

Roofing Craftsman

Les Compagnons du Devoir ·
2014-2016
